Whereas:	Students are unable to effectively plan their academic schedules unless the frequency of course offerings is provided well in advance of their estimated enrollment in the course; and
Whereas:	A system similar to that utilized by the Mechanical Engineering Department in the College of Engineering in the current UNDERGRADUATE CATALOG would allow more effective academic planning by students.

Be It Further Resolved That:	Where possible, the semester in which the courses will be offered shall be published, or otherwise indicate the frequency with which the courses will be offered; and
Be It Further Resolved That:	This listing be published for the 1991-93 academic period as an addendum to the 1991-93 Undergraduate Catalog, and that future listings be incorporated in all future editions of the Undergraduate Catalog.

**SUBJECT:** Student Congress Resolution 91-10  
Limited Course Offerings

Vice President W. A. Baker has examined this resolution and concurs with its intent. He will ask the various departments to either post or make known by other means a listing of courses that are not offered on a semesterly basis.

It should be emphasized, however, that a course not appearing on the list will not necessarily be taught every semester. Current budget problems are forcing departments to teach some courses less often than in the past and less often than is desirable. Such decisions may be made on short notice.

COMMENTS BY STUDENT CONGRESS PRESIDENT:

I am aware that some departments already do this to some extent, that is, some departments already have a listing for courses to be offered in the spring posted outside of the department. However, I feel that if each department were required to do this, all students would benefit; especially students who may need a particular class to graduate and it is not offered on a semesterly basis. I fully support the implementation of this resolution.
