Whereas:	Every year the campus police oversell parking decals under the false impression that enough of these "oversold" stickers are for the night students; and
Whereas:	This is obviously not good reasoning, considering the current parking problems day students face; and
Whereas:	There are plenty of spaces in remote parking that are not used; and
Whereas:	At other universities - such as Texas A&M, underclassmen are required to park in a remote area; and
Whereas:	This could possibly end our parking problems and definitely decrease them.
Be It Therefore Resolved That:	Freshmen students be required to park in remote parking to allow for adequate space for upperclassmen.
